

WARD STREET

Project Features

- Municipal Class EA - Schedule C
- Public Information Centres
- Consultation with Bridgenorth Business Community

Client: County of Peterborough

Completion Date: In Progress

Services Provided :

- Municipal Engineering
- Functional Design
- Project Management
- Accessibility and Streetscape Design

This project is currently underway and is in the public consultation phase. The objectives of the study are to improve traffic capacity and operations while providing improved pedestrian facilities and streetscaping enhancements to the corridor. The study must balance the competing functions of Ward Street as a high-capacity County arterial road and as the “main street” in the village of Bridgenorth, providing access to homes and businesses
